engineer with a focus on front-end development • perpetual learner with an eclectic range of interests

Experience

Technical Lead, Software Engineer

01/2020 – present
Bellevue, WA

Mindtree

ReactJS, TypeScript, Redux, Sass, NodeJS, Jest, Enzyme, Git, Azure DevOps

- collaborated with other engineers, data scientists, and designers to build Microsoft Power Platform products including Virtual Agents, an app that allows easy creation of AI chat bots via a graphical UI
- rebuilt software license expiry page according to design specifications documented in Figma using Sass
- converted application to adhere to new TSLint standards to enforce stylistically consistent codebase
- wrote automated unit tests using Jest and Enzyme to encourage quality code and early bug detection
- applied telemetry data to UI components to allow data scientists to access to behavioral user data
- restyled UI components to become responsive at 200% zoom aligning with A11y accessibility standards

Form Designer

06/2018 – 12/2019
Bothell, WA

ConnectWise

HTML, JavaScript, CSS, jQuery, C#, ReactJS

- engineered custom UI solutions on ConnectWise Sell, a globally distributed SaaS B2B quoting app
- maintained rank #1 (98.3%) client satisfaction score collaborating with 300+ stakeholders of technical ability ranging from admin assistants, software developers, marketing managers, CTO's, and CEO's
- instructed classrooms of business partners on HTML, CSS, proprietary markup language, and how to leverage them to meet specific business requirements
- maximized billable hours and managing time by prioritizing 20+ projects simultaneously, building web applications from both detailed technical wireframes and ambiguous design specifications
- provided accurate time estimates on project completion to clients and internal project managers
- performed image alterations and graphic design in Adobe Photoshop CC and Illustrator CC

Web Development Consultant

04/2017 – 03/2018
Lynnwood, WA

Self

C#, JavaScript, CSS, HTML, jQuery, ASP.NET Core, Azure, MySQL

- served as sole web developer for startup, Locale, and developed online poll component from UI to database allowing for collection of user data to store into MySQL database deployed on Microsoft Azure
- implemented self-scheduling system enabling customers to book appointments online for local business, Skincare Boutique

Delivery Partner

10/2015 – 12/2016
Kirkland, WA

Amazon.com

- contributed as key team member for Prime Now, one of the fastest growing businesses in United States
- maintained 100% reliability and 100% successful delivery ratings in deadline-oriented environment
- trained junior delivery partners in fast-paced workplace with constantly changing procedures and policies

Skills

Languages

JavaScript, Typescript, HTML, CSS, C#, Python, SQL

Frameworks/Libraries

ReactJS, jQuery, ASP.NET Core

Other Technologies

AJAX, JSON, REST, Git, Azure, Node.js

Portfolio

Fantasy Charts

C#, ASP.NET Core, HTML5, JavaScript, CSS3, jQuery

- developed custom REST API that sorts and formats data from data.nba.net and returns actionable insights for fantasy basketball team managers seeking to make optimal, data-driven decisions in C# ASP.NET Core
- optimized application performance by minimizing number of external HTTP requests to data.nba.net

Education

Bachelor of Science, Public Policy
The University of Arizona

08/2010 – 05/2015
Tucson, AZ
