Technical Skills

Languages	Javascript, JSX, C#, Typescript Python, SQL, HTML, CSS
Frameworks	ASP.NET Core, ReactJS, AngularJS, Entity Framework Core
Databases	MySQL, phpMyAdmin, SQLite, PostgreSQL, MongoDB
Other Technologies	JQuery, AJAX, JSON, REST, LINQ, Git, Azure, Node.js

Portfolio

NBAlance
Built data visualization app for fantasy basketball enthusiasts that analyzes statistics between fantasy teams using: object-oriented C#, Javascript, ASP.NET Core, JQuery, AJAX, D3.js, Bootstrap, data.nba.net API.
- leveraged data.nba.net API to build a custom REST API that returns actionable insights for team managers
- optimized code to run faster by minimizing number of external HTTP requests to data.nba.net
- wrote backend that validates and constructs custom player models in C# ASP.NET Core
- created function that accepts route parameters enabling users to easily save & share analyses with others

The Local Market
Worked closely with early stage startup as sole developer to implement user information solutions and customer facing website with: C#, ASP.NET Core, JQuery, AJAX, Bootstrap, & deployed via Azure.
- created site to collect actionable market intelligence & deployed to Azure's Git deployment & MySQL in-app • wrote survey to automatically get & store users' IP & location info via external web API call
- built admin panel for those to display & update poll data in real-time as users submit surveys with JQuery

Education

The University of Arizona
08/2010 – 05/2015
Bachelor of Science Public Policy
Tucson, AZ
