Professional Summary

Full-stack software engineer specializing in API architecture, enterprise SaaS integration, and high-performance data systems. Expert in building RESTful services, ETL pipelines, and real-time streaming applications with a focus on tick-level precision and scalable infrastructure.

Technical Skills

- **Languages:** Python, TypeScript, JavaScript (ES6+), C#, Ruby, SQL.
- **Integrations:** Ollama API, Tradestation Web API, Polymarket API, Stripe SDK, Google Maps SDK.
- **Frontend:** React, Next.js, Redux, TailwindCSS, Shadcn, Material UI, Fluent UI, SASS, CSS.
- **Backend:** Node.js, FastAPI, Redis, Prisma, Numpy, Pandas.
- **Cloud:** AWS, Azure, Google Cloud Platform, Vercel, Cloudflare, Oracle Cloud Infrastructure.
- **Tools & Testing:** Jest, Vitest, Playwright, Vite, Webpack, Azure DevOps, Git, Docker
- **Methodologies:** Agile/Scrum, Design Systems, UI Performance Optimization, WCAG 2.1.
- **AI-assisted development workflows:** Claude Code, ChatGPT Codex, Cursor, Github Copilot, Ollama, OpenCode

Professional Experience

Project Lead & Developer | LiveTape.ai | 09/2023 – Present

- Designed and built a full-stack SaaS platform end-to-end: **React/TypeScript** frontend, **Python/FastAPI** backend, **PostgreSQL** with **Alembic** migrations, **Redis** pub/sub, **JWT** auth via fastapi-users, and **Docker** Compose deployment on **OCI ARM64** behind **Cloudflare Workers**.
- Architected a lock-free, zero-copy IPC layer between a ring buffer writer and multiple concurrent eval workers using a seqlock-protected memory-mapped file — readers spin without syscalls, writers never block reads, and the shared state requires no mutex or message queue.
- Built a multi-tenant async worker that evaluates user-defined logic trees against live data snapshots on a per-event basis — up to 50 concurrent runtimes in a single asyncio loop with per-runtime isolated state and no DB access on the hot path.
- Delivered live state updates to the browser via **Redis** pub/sub to **WebSocket** fan-out, with display publishing throttled independently from business logic execution and UI refresh rate.

Software Engineer II | Smartsheet | 06/2021 – 09/2023

- Developed and maintained core features for Smartsheet Control Center, an enterprise app used by 96% of the Fortune 100 using **React**, **TypeScript**, **Node.js**, and Ruby
- Contributed to the Lodestar React design system, creating accessible components that reduced UI development time by 20% across engineering teams.
- Shipped Control Center features to 96 of the Fortune 100 by coordinating API contracts across frontend and backend teams.
- Developed API-driven integrations with internal enterprise systems to improve cross-functional operational efficiency.
- Led internationalization (i18n) initiative to ensure seamless user experiences across global markets.

Software Engineer (Technical Lead) | Microsoft (Mindtree, Insight Global) | 01/2020 – 05/2021

- Developed Power Platform products including AI Builder, exposing complex business logic via scalable APIs for external consumption.
- Modernized backend-to-frontend interfaces, ensuring consistent high-quality code and standards adherence across multiple engineering teams.
- Collaborated with UX designers to translate **Figma** mockups into pixel-perfect, modular **React** components.
- Achieved **WCAG 2.1** compliance for critical admin workflows, enhancing accessibility for users with disabilities.
- Configured **Azure DevOps** CI/CD workflows to streamline the deployment of frontend assets and backend services.

Form Designer | ConnectWise | 06/2018 – 12/2019

- Engineered custom web UI solutions for a global SaaS CPQ platform, integrating frontend interfaces with complex backend **C#** systems.
- Managed end-to-end technical solutions for 300+ stakeholders, maintaining the #1 client satisfaction ranking.

Education & Certifications

- **Bachelor of Science, Public Policy | The University of Arizona.**
- **Microsoft Certified: Azure Fundamentals (AZ-900).**
- **AWS Certified Machine Learning Engineer – Associate (In Progress)**
