LiveTape.ai

The runtime for stateful trading agents.

Visual strategy building · persistent execution · multi-asset

William · Founder & Engineer contact@livetape.ai livetape.ai

THE PROBLEM

Retail traders keep hitting the same wall.

A

Learn to code it yourself

- Months of engineering before a strategy ever goes live
- Or locks you into a proprietary signal language first (Pine Script, etc.)

B

Use a no-code bot builder

- Rigid and limited — hard to express anything beyond basic rules
- Stateless, bar-close-only execution — no memory, no real-time logic

C

Ask an AI to build it

- “I got AI to trade for me” everywhere on social media
- In reality: hope the stranger’s works on your machine

Every path ends the same way: no safe, persistent runtime to actually execute on.

THE SOLUTION

LiveTape: stateful trading agents, built visually.

1

Visual strategy builder

Build visually, or describe it to any AI and import instantly.

2

Self-contained runtime

Own runtime, persists state — no external platform required.

3

Language-agnostic format

Strategies compile to a portable JSON AST — no proprietary language.

4

Cross-market state

Tracks multiple assets, timeframes & exchanges — not single-asset bars.

5

Live observability

Logs and condition traces show exactly what's happening, live.

6

Non-custodial by design

Never holds funds or exchange credentials on your behalf.

Compatible with any AI (Claude, ChatGPT, Gemini)

MARKET OPPORTUNITY

A large, fast-growing, underserved market.

TAM

\$44.3B

Global algorithmic trading market by 2030

Up from \$25.0B in 2026 · 15.4% CAGR

Source: industry market sizing research, 2026

SAM — Serviceable Available Market

\$3.2B

Define your addressable segment

e.g., retail / prosumer algo traders + prediction-market users

SOM — Serviceable Obtainable Market

7.4M

Define your realistic 12–24 month target

users × ARPU, bottoms-up

Subscription revenue, decoupled from trading outcomes.

How LiveTape makes money

- Subscription fees only — never tied to trading performance
- Not a broker, exchange, or investment adviser
- Sits outside performance-fee / AUM regulatory exposure
- *Exploring: volume-based routing revenue from prediction-market venues*

Pricing & unit economics

Pricing tiers

*Starter, Pro, Max,
Custom/Enterprise*

TRACTION

Pre-launch. Built, and moving fast.

No users yet — the story right now is product velocity, solo.

Core platform live

Visual strategy builder + deterministic execution engine, working end-to-end.

Live observability

Live execution logs and condition traces shipped.

Polymarket integration live

Prediction-market search and trading support shipped.

Privy wallet connectivity shipped

Shipped yesterday — unlocks self-custodied wallets for automated Polymarket agents.

Time to build solo: 4 months Next: onboard first live users

COMPETITIVE LANDSCAPE

Others build signals. LiveTape builds runtime.

Capability	LiveTape	TradingView	3Commas	TrendSpider
No-code visual builder	✓	– (Pine Script)	– (canned templates)	✓
Persistent state / memory	✓	✗	✗	✗
Live execution observability	✓	–	–	–
Deep backtesting	✓	✓	✗ (afterthought)	– (2-indicator cap)
Non-custodial	✓	n/a	– (API keys)	n/a
Prediction markets	✓	✗	✗	✗

TEAM

Built by the people shipping it.

William

Founder & Engineer

- Solo founder — owns product, infrastructure, and the execution engine end-to-end
- Self-taught programmer, non-technical University of Arizona degree
- 8 years of experience, including software engineering roles at Microsoft and Smartsheet

FINANCIAL PROJECTIONS

3-5 year outlook.

Metric	Year 1	Year 2	Year 3
Revenue	\$350,000	\$2,400,000	\$7,500,000
Expenses	-\$480,000	\$1,150,000	\$3,200,000
Net burn / profit	-\$130,000	+\$1,250,000	+\$4,300,000

Near-zero infrastructure cost (Oracle Cloud Infrastructure Ampere ARM64 + Cloudflare Workers) until scaling required
